## DETAILED ACTION

### *Specification*

1. The disclosure is objected to because there is no page number at the bottom of the page-indicating page one. Correction is required.
2. The disclosure is objected to because of the following informalities: Applicant recites several test standards that the Examiner is not able to obtain. It is requested that for the purpose of clarity and being made of record Applicant submit an English version of the test standards that Applicant recites on page 3, line 14 DIN EN 388 and on page 4, line 12 DIN 53362. Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or  
(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United

Art Unit: 1771

States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

4. Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by USPN 6,103,371 to PRICKETT. Prickett teaches a fabric made using a para-aramid yarn having increased cut resistance and maintained comfort wherein the yarn has a low twist and the staple fibers in the yarn have a high linear density (abstract). The instant patent relates to articles of apparel (gloves column 3, line 66) of improved cut resistant made from yarn having a linear density of 150 to 5900 dtex (133 to 5315 denier) wherein the yarn includes a para-aramid staple fibers have a linear density of 3 to 6 dtex and a length of 2.5 to 15.2 centimeters (column 1, lines 25-30 and column 2, lines 15-33) thereby meeting the limitation of claim 5. The preferred para-aramid polymer that is used is a poly (p-phenylene terephthalamide) or PPD-T, which is the same polymer as, sought by Applicant in claim 3 (column 1, lines 54-60). In column 2 in the last paragraph and column 3, lines 26-50 patentee discloses the use of staple fibers with a linear density less than or equal to 2.5 dtex, which meets the limitations sought by Applicant in claim 4. The staple fibers used in this invention may be stretch - breaking yarns (column 2, lines 25-33). Therefore, Prickett anticipates a cut resistant article comprising polyamide microfilaments, specifically comprising a para-aramid, more specifically a poly (p-phenylene terephthalamide polymer having a dtex of 1.3 or less and a filament length between 38 and 100 mm.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ms. Arti R. Singh whose telephone number is 703-305-0291. The examiner can normally be reached on M-F 7:00am to 4:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Terrel Morris can be reached on 703-308-2414. The fax phone numbers for the
